

The Shopify GitLab App Shopify GitHub 应用程序

Shopify offers a [Shopify app](#) to connect your Shopify and GitHub accounts. Use it when developing [themes](#) and [Hydrogen storefronts](#).

Shopify 提供了一个 GitHub 应用程序来连接您的 Shopify 和 GitHub 帐户。在[开发主题](#)和[Hydrogen 店面](#)时使用它。

Connect Shopify and GitHub 连接 Shopify 和 GitHub

Install the [Shopify GitHub app](#) to connect your accounts.
安装 [Shopify GitHub 应用](#) 以关联您的帐户。

Your Shopify account can only be connected to one GitHub account, which is why we recommend using [organization accounts](#), which enable more flexible access control.

您的 Shopify 帐户只能[连接到一个](#) GitHub 帐户，因此我们[建议使用组织帐户](#)，这样可以实现更灵活的访问控制。

Organization accounts 组织帐户

We recommend using [GitHub organizations](#) if possible. Organizations work with multiple individual GitHub accounts, enabling easier collaboration for teams, and more secure access control for GitHub repositories and Shopify stores.

如果可能，建议使用 [GitHub 组织](#)，组织使用多个单独的 GitHub 帐户，使团队能够更轻松地协作，并为 GitHub 存储库和 Shopify 商店提供更安全的访问控制。

Organization accounts are particularly helpful if you need to [transfer repository ownership](#), which is common for agencies and freelance developers.

如果您需要[转移存储库所有权](#)，组织帐户特别有用，这对于代理机构和自由开发人员来说很常见。

Personal accounts 个人账户

You can connect your personal GitHub account to Shopify, but you can only have one Shopify account connected to one personal GitHub account at a time. That's why we recommend using [organization accounts](#) if possible.

您可以将个人 GitHub 帐户连接到 Shopify，但一次只能将一个 Shopify 帐户连接到一个个人 GitHub 帐户，因此，我们建议尽可能使用[组织帐户](#)。

You can convert a [personal GitHub account to an organization](#).

可以将[个人 GitHub 帐户](#)转换为[组织](#)。

Required GitHub permissions 所需的 GitHub 权限

For security reasons, we recommend granting access permission on a per-repository basis, instead of granting them for all repositories in your account or organization.

出于安全原因，我们建议按存储库授予访问权限，而不是为帐户或组织中的所有存储库授予访问权限。

Read and write access 读写访问权限	Read access 读取访问权限
- Repository permissions 存储库权限 - Administration 管理 - Contents 内容 - Dependabot secrets Dependabot 机密 - Pull requests 拉取请求 - Secrets 秘密 - GitHub Actions GitHub 作 - Workflows 工作流程	- Account permissions 帐户权限 - Email addresses 电子邮件地址 - Organization permissions 组织权限 - Members 成员 - Repository permissions 存储库权限 - Deployments 部署 - Events 事件 - Delete 删除 - Organization 组织 - Public 公共 - Pull request 拉取请求 - Push 推 - Workflow run 工作流程运行 - Workflow job 工作流作业

Disconnect Shopify and GitHub 断开 Shopify 和 GitHub 的连接

You can disconnect your Shopify and GitHub accounts in your GitHub settings:

您可以在 GitHub 设置中断开 Shopify 和 GitHub 帐户的关联：

1. Open your [GitHub settings for app authorizations](#).
打开 GitHub 设置以进行应用授权
2. Beside the Shopify app, click [Revoke](#).
在 Shopify 应用旁边，点击[撤销](#)。

Check the GitHub docs for more details on [deleting GitHub apps](#).

有关[删除 GitHub 应用程序](#)的更多详细信息，请查看 GitHub 文档。

Troubleshooting and known limitations 故障排除和已知限制

- If you're connecting a new development store, then you can't set up the GitHub app on the initial login after the store is created. Log out of your development store and log in again through the Partner Dashboard before proceeding.
如果要连接新的开发商店，则无法在创建商店后的初始登录时设置 GitHub 应用。注销您的开发商店，然后通过合作伙伴仪表板重新登录，然后再继续。
- If you access GitHub with SAML/SSO, you need an active SAML session to use the Shopify GitHub app. You can create a new SAML session by going to https://github.com/orgs/YOUR_ORGANIZATION/sso.
如果您使用 SAML/SSO 访问 GitHub，则需要有效的 SAML 会话才能使用 Shopify GitHub 应用。您可以通过转到 https://github.com/orgs/YOUR_ORGANIZATION/sso 创建新的 SAML 会话。
- If your GitHub organization enables SAML/SSO and you already had the Shopify GitHub app installed, then you'll need to [re-authorize all your GitHub apps](#), including the Shopify app.
如果您的 GitHub 组织启用了 SAML/SSO，并且您已经安装了 Shopify GitHub 应用，则需要[重新授权所有 GitHub 应用](#)，包括 Shopify 应用。
- The Shopify GitHub app doesn't support the [IP allow list](#) feature of GitHub Enterprise Cloud. Shopify GitHub 应用不支持 GitHub Enterprise Cloud 的 [IP 允许列表](#) 功能。
- If you convert your user account to an organization, then you'll need to uninstall and reinstall the Shopify GitHub app.
如果您[将用户帐户转换为组织](#)，则需要卸载并重新安装 Shopify GitHub 应用。
- When connecting a repository, if you don't see the one you want to connect in the list of available repositories, then the GitHub organization owner will need to [update the repository access settings](#) for the Shopify GitHub app.

连接存储库时，如果您在可用存储库列表中没有看到要连接的存储库，则 GitHub 组织所有者将需要更新 Shopify GitHub 应用的[存储库访问设置](#)。

Using GitHub in Shopify development 在 Shopify 开发中使用 GitHub

GitHub integration for themes 主题的 GitHub 集成

Link your themes to GitHub repositories for two-way synchronization and version control
将主题链接到 GitHub 存储库，以实现双向同步和版本控制

Hydrogen CI/CD with GitHub Hydrogen CI/CD 与 GitHub

Set up continuous integration and deployment for your Hydrogen storefronts
为您的 Hydrogen 店面设置持续集成和部署
